

(e) List three ways in which a calendar helped people 3000 years ago.

(f) List three ways in which a calendar helps you today.

(g) Three thousand years ago, Greek and Chinese astronomers mapped 800 stars. We know now that there are billions of stars. Why did these astronomers map only 800 stars?

(h) If the Egyptian statue was in sunlight for only two days of the year, the Sun must be in that position only on those days. How did astronomers from ancient times discover this?

Bonus: Word Scramble

Unscramble the following words:

EEGNDL

DRALACEN

TYMH

TRYMONAOS

RTAS SMPA
